

THE BRAND DECK

Version 6.0 • Aug 11 2020

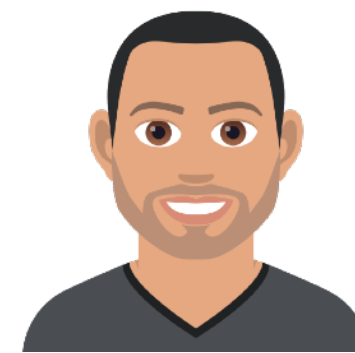

ABOUT US

A PASSION FOR DESIGN

“In 2014, emoji were just hitting the scene and you couldn’t legally license the icons we knew and loved by Apple (or others). Every problem needs to be solved by someone. So why not us? Within 6 months, **EmojiOne was born**. The first and only open source emoji set freely available to anyone for any project imaginable.

At the time, a Unicode-compliant emoji font required 870 icons. Today it’s 3,342! The fastest growing language takes more care and effort than ever. We take extreme care to maximize every last icon. **Design is our joy** and emoji is our masterpiece. Thank you for taking a moment to learn about our journey. Enjoy!”

Rick Moby, CEO/Founder

OUR MISSION

Deliver maximum joy through masterful design.

Being a contributor to the world's universal picture language is a cherished **privilege** and responsibility we will never take for granted. With extreme care and passion, our mission puts quality engineering first.

Be unique, be imaginative, and push for **greatness** with each new iteration. The world has embraced emoji. We're grateful to share our gift to the world.

#spreadthejoy

AT THE CORE

The principals.

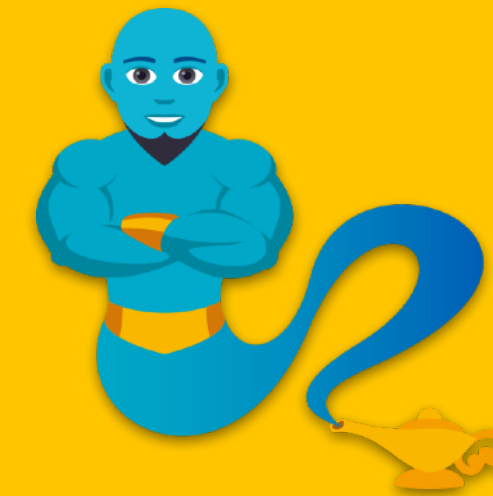

MINDFUL DESIGN

We're a design company first. The product quality doubles as our primary marketing vehicle. We put tremendous care into our work. Design is the forefront.

FAST MOVERS

As a small organization, we enjoy the luxury of pressing hard on the gas and turning on a dime. We're known as being one of the first to release new Unicode emoji yearly.

FRIENDLY SERVICE

As an enterprise level product, we must always maintain a high level of service. More than that, we simply believe in treating others with prompt attention and kindness.

LIFE LOVERS

A happy staff is a happy organization. Maintaining proper work-life balance is an absolute must. We make it a point to enjoy the world around us, as much as we do our work.

PLATFORM AGNOSTIC

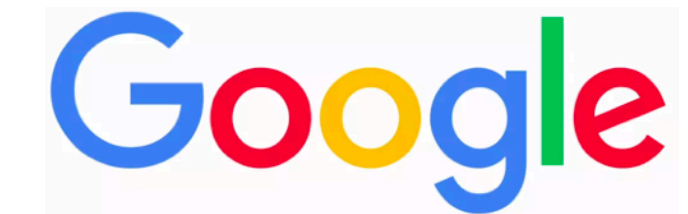

JoyPixels is not operated and built for any specific company or platform. We serve as an agnostic emoji provider for platforms and projects worldwide.

SAMSUNG

IT STARTED WITH A SMILE

This is the first smiley we ever developed, back in early 2014. After failing to locate a licensable emoji set, we decided to simply invent one. Our open source emoji, *EmojiOne*, was born just 5 months later.

Our very first emoji developed in April 2014.

2014

We launched as EmojiOne, the first ever Unicode-compliant open source emoji.

2020

Today we're JoyPixels, a full service emoji provider and remain free for personal use.

OUR LIBRARY

QUALITY COMBINED WITH QUANTITY

Our extensive collection goes far beyond native Unicode icons. We develop and license many other emoji-inspired libraries that bring value to other product categories.

JoyPixels 6.0

3,342 icons

Animations 3.0

VECTOR BASED EMOJI ICONS

Unlike emoji from most other vendors, our designs are built on vector layers. This provides the most versatile file format you can work with. With our svg files, you'll be working with a raw file that can be edited and scaled infinitely without sacrificing quality.

Our vector files (.svg) include every raw editable layer.

JoyPixels 6.0

Our flagship Unicode-compliant emoji icon collection. The only authentic font available for commercial licensing.

WE SATISFIED CUSTOMERS

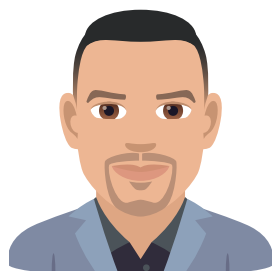

Scott Werndorfer

"Having gone through the pain of designing our own emoji in the past, we have a deep respect and appreciation for what the team at JoyPixels has accomplished.

The quality of their artwork consistently exceeds our expectations and we're thrilled to include their emoji in Trillian!"

Mike Gillespie

"Marcie and JoyPixels were supportive partners in helping us obtain the emojis we needed for our creative project.

Their extensive suite of emoji exceeded my expectations. When the need calls, I will strongly consider working with JoyPixels again."

Alex Shevchenko

"Joypixel's emoji artwork library is incredibly rich, high quality, and constantly growing.

Thank you for continuing to delight our users with your products!"

Martin Cantwell

"Our users absolutely love the vivid and concise graphics on the JoyPixel emojis, no more confusion about what each emoji signifies.

Updated frequently, contemporary and playful, we and our users love JoyPixel emojis!"

CASE STUDIES

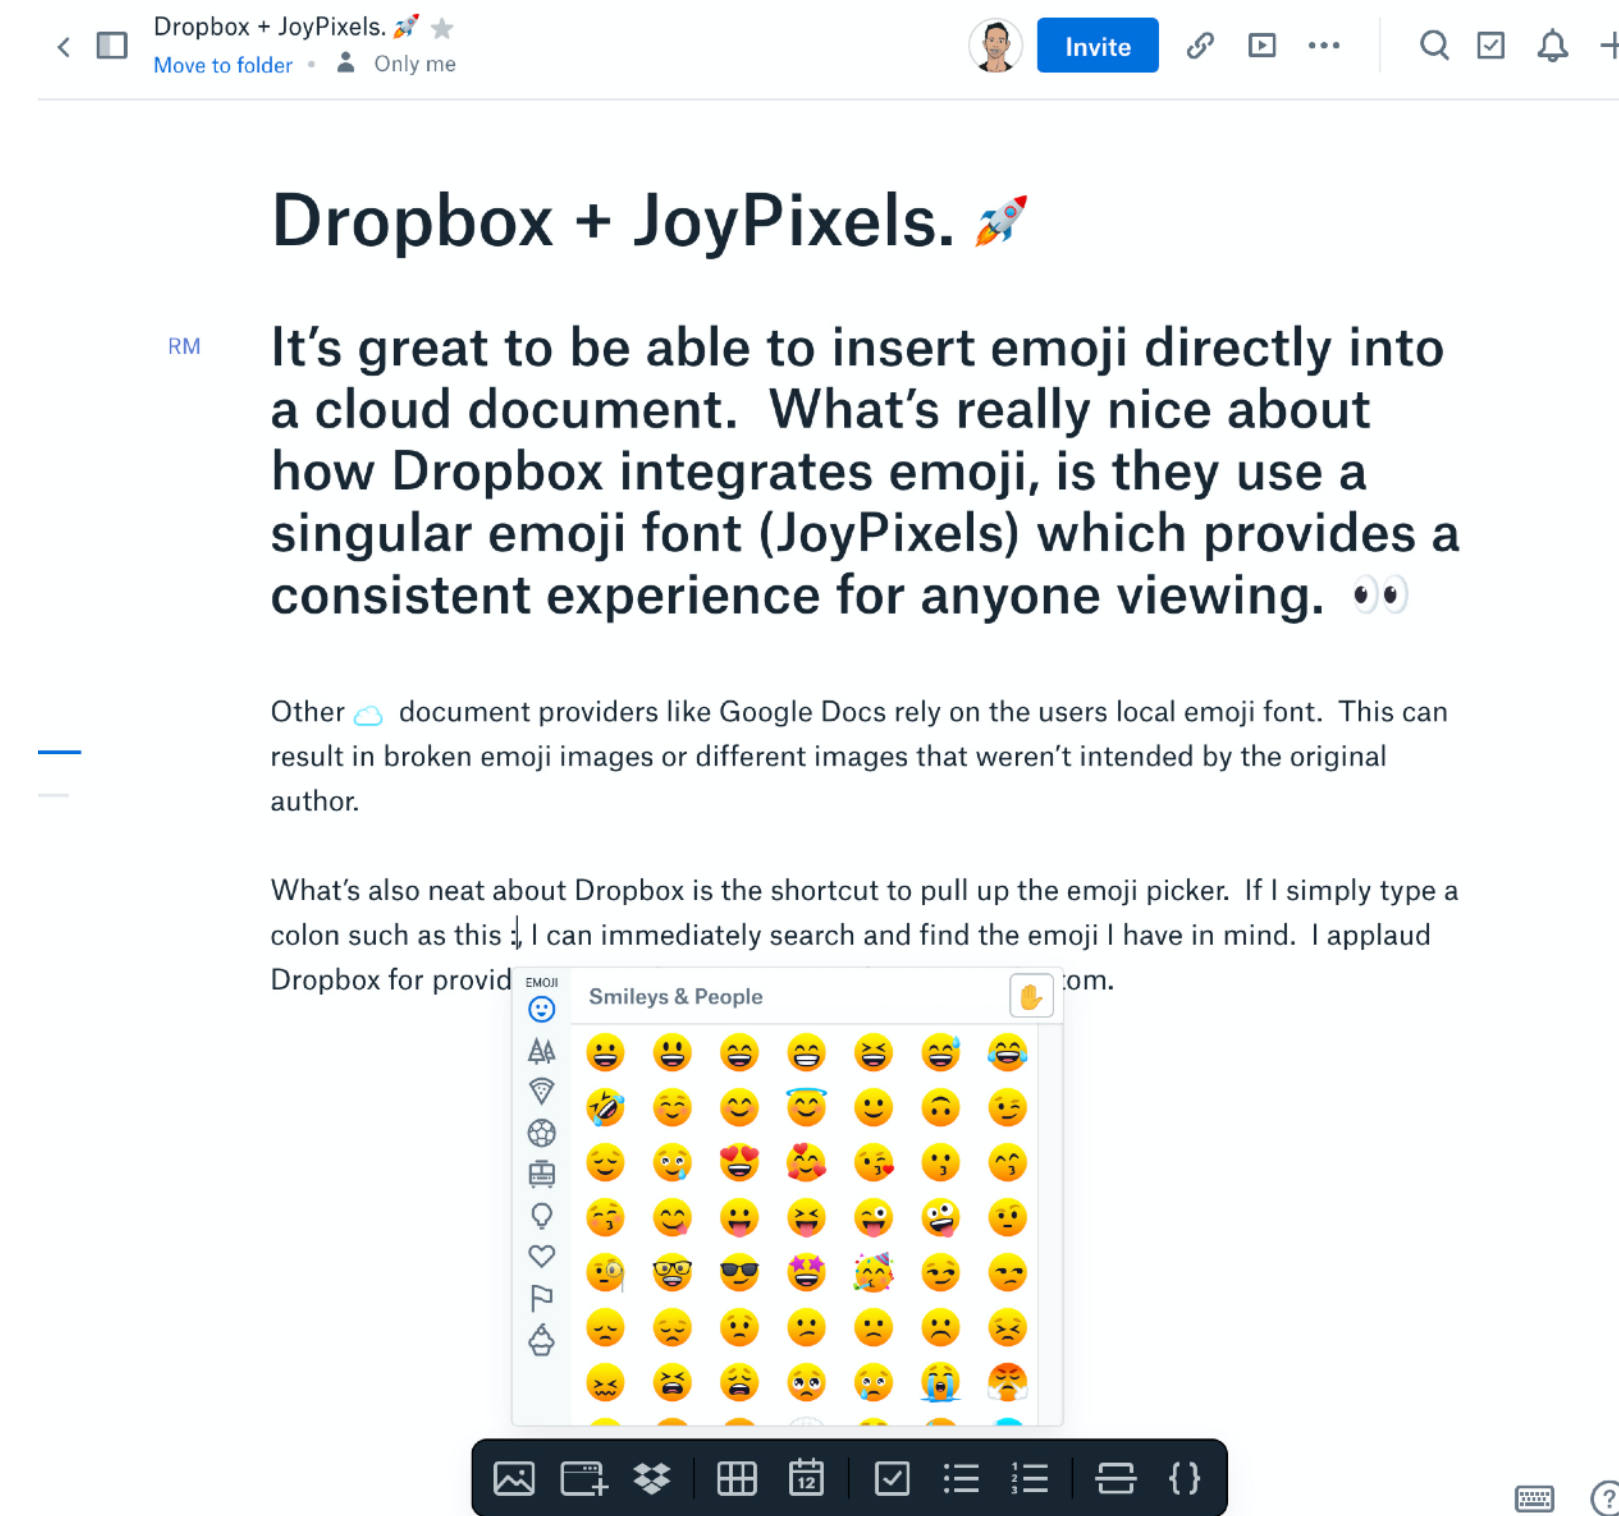

JoyPixels emoji integrated into digital apps/websites.

Case Study:

Dropbox Paper

Dropbox Paper is a fast growing cloud document alternative to Google Docs. Unlike Google Docs, Dropbox provides a much more seamless emoji experience for the end user with an exclusive JoyPixels emoji font.

By overriding the users system emoji, this guarantees the emoji intended by the original author will always display properly for the document readers.

A sample document from Dropbox Paper.

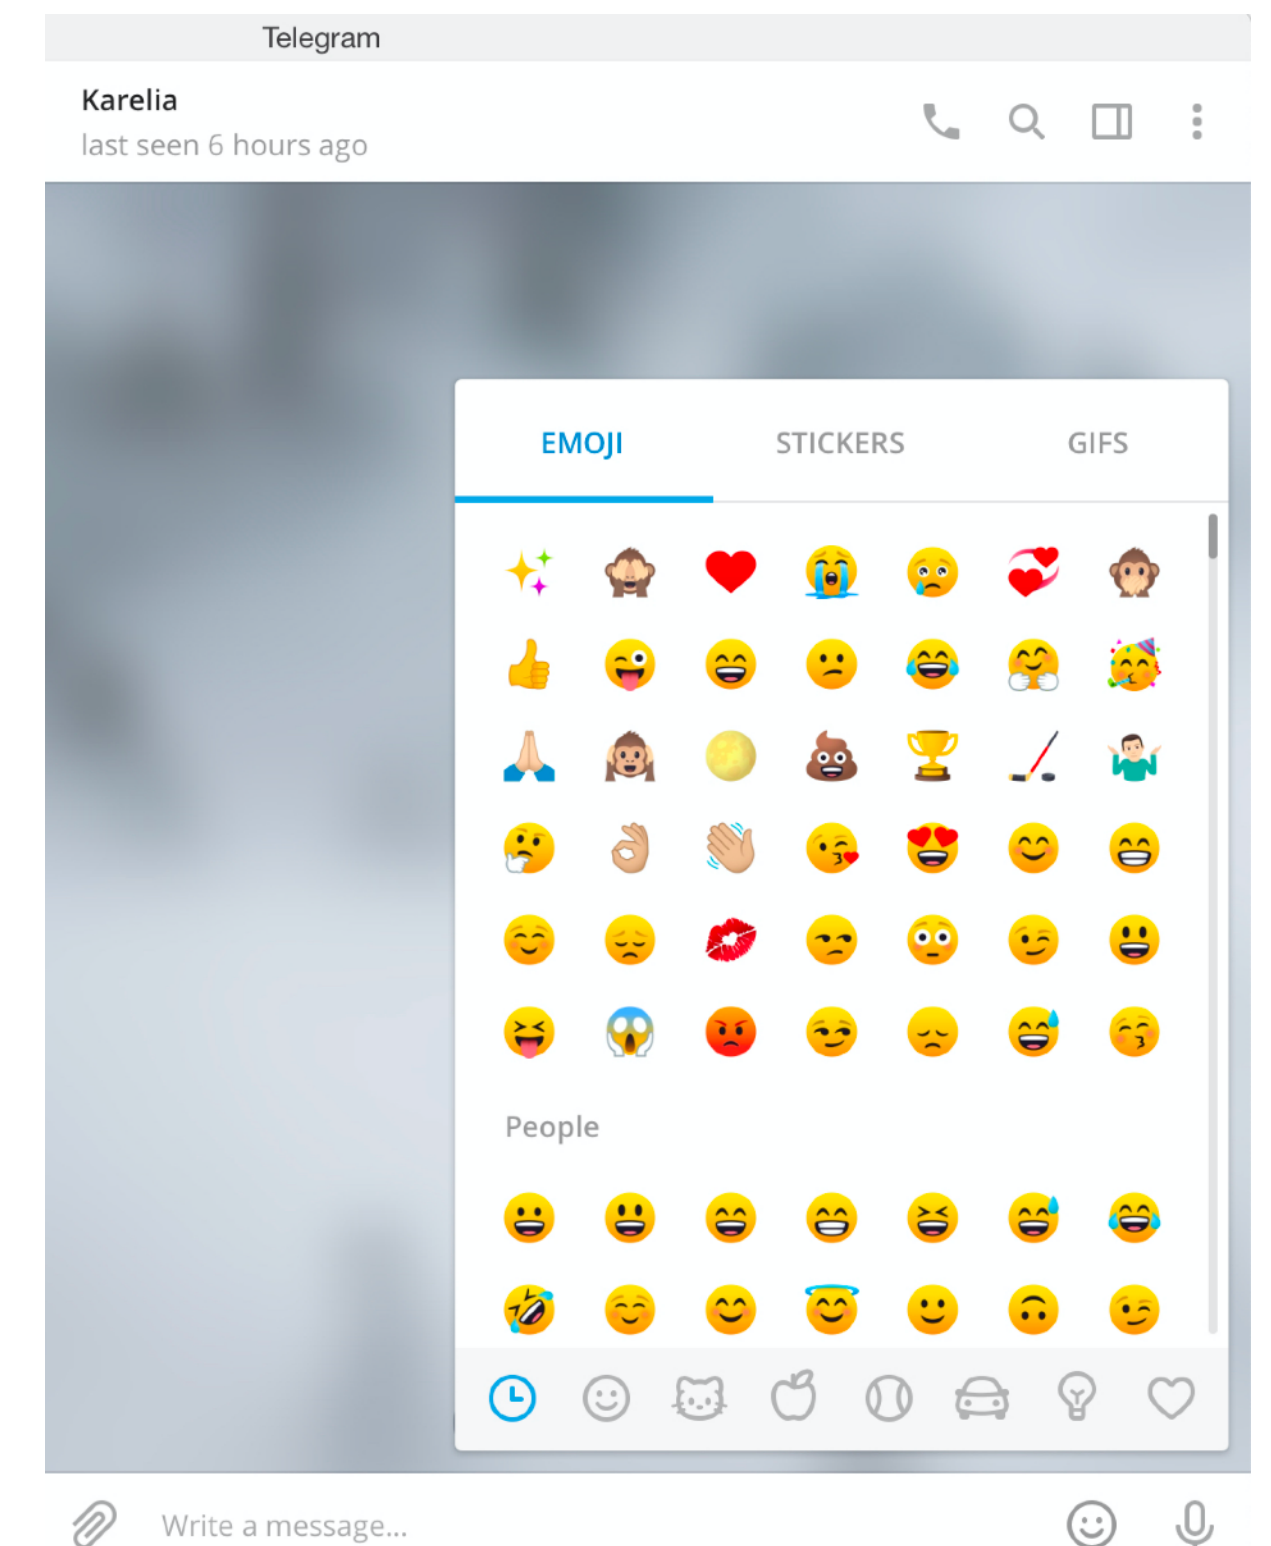

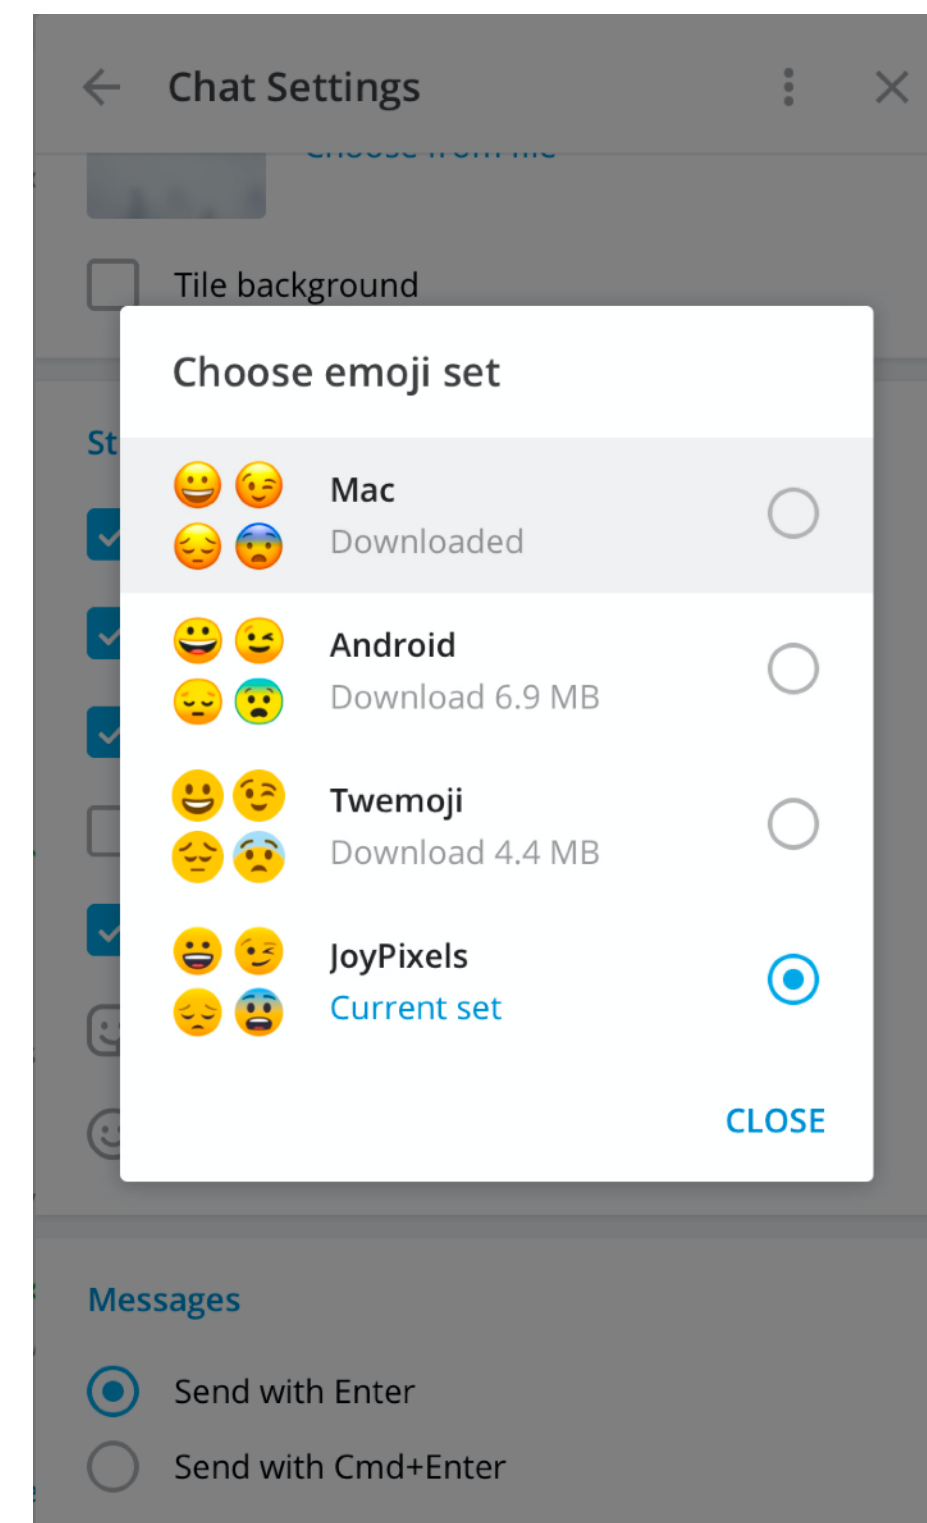

APPS

JoyPixels emoji integrated into digital apps/websites.

Case Study:

Telegram

Telegram is one of the largest and most well-known cross-platform messaging apps in the world. Within the chat settings, users are able to select JoyPixels as the primary emoji font (compatible with Android and desktop apps). JoyPixels is 1 in 4 emoji available for Telegram users.

APPS

JoyPixels emoji integrated into digital apps/websites.

Case Study:

Tik Tok

Tik Tok has grown to become one of the hottest and most used apps among younger adults. We're really excited to have JoyPixels within their Android app as both UI icons and emoji used to decorate user created content. It doesn't get much bigger than Tik Tok.

JoyPixels emoji featured in television, streaming, and movies.

Case Study:

HBO

For their new hit, I May Destroy You, HBO directly licensed JoyPixels to provide live streaming emoji reactions for the primary character.

It's becoming more and more common for TV and film studios to seek out JoyPixels to provide enterprise level icons and custom agreements.

JoyPixels emoji featured in television, streaming, and movies.

Case Study:

Lemon Studios

Olivares licensed a wide array of JoyPixels 5.0 icons for two different Netflix original series in 2020, Control Z and Monarca.

You can see in this Control Z trailer how emoji creatively impacts the landscape along with emoji into on-screen messaging. Emoji are used to attract and represent the younger adult demographic.

ADVERTISING

JoyPixels emoji featured in advertising campaigns.

Case Study:

Sky Mobile

Sky is a leading provider of TV, broadband, and mobile services in the UK. They recently commissioned JoyPixels for emoji usage within their 'Switch' campaign.

Usage included both out of home materials, retail posters, and digital ads. Ads that contain emoji have proven to grab more attention than those without.

Case Study:

2 Degrees

2 Degrees is a leading provider of TV, broadband, and mobile services in New Zealand. They trusted JoyPixels to provide emoji for a wide variety of uses.

They were given permission to modify our icons to give them a more 3D edge. They integrated the icons into several digital ads and throughout their website.

[View clip on Vimeo](#)

ADVERTISING

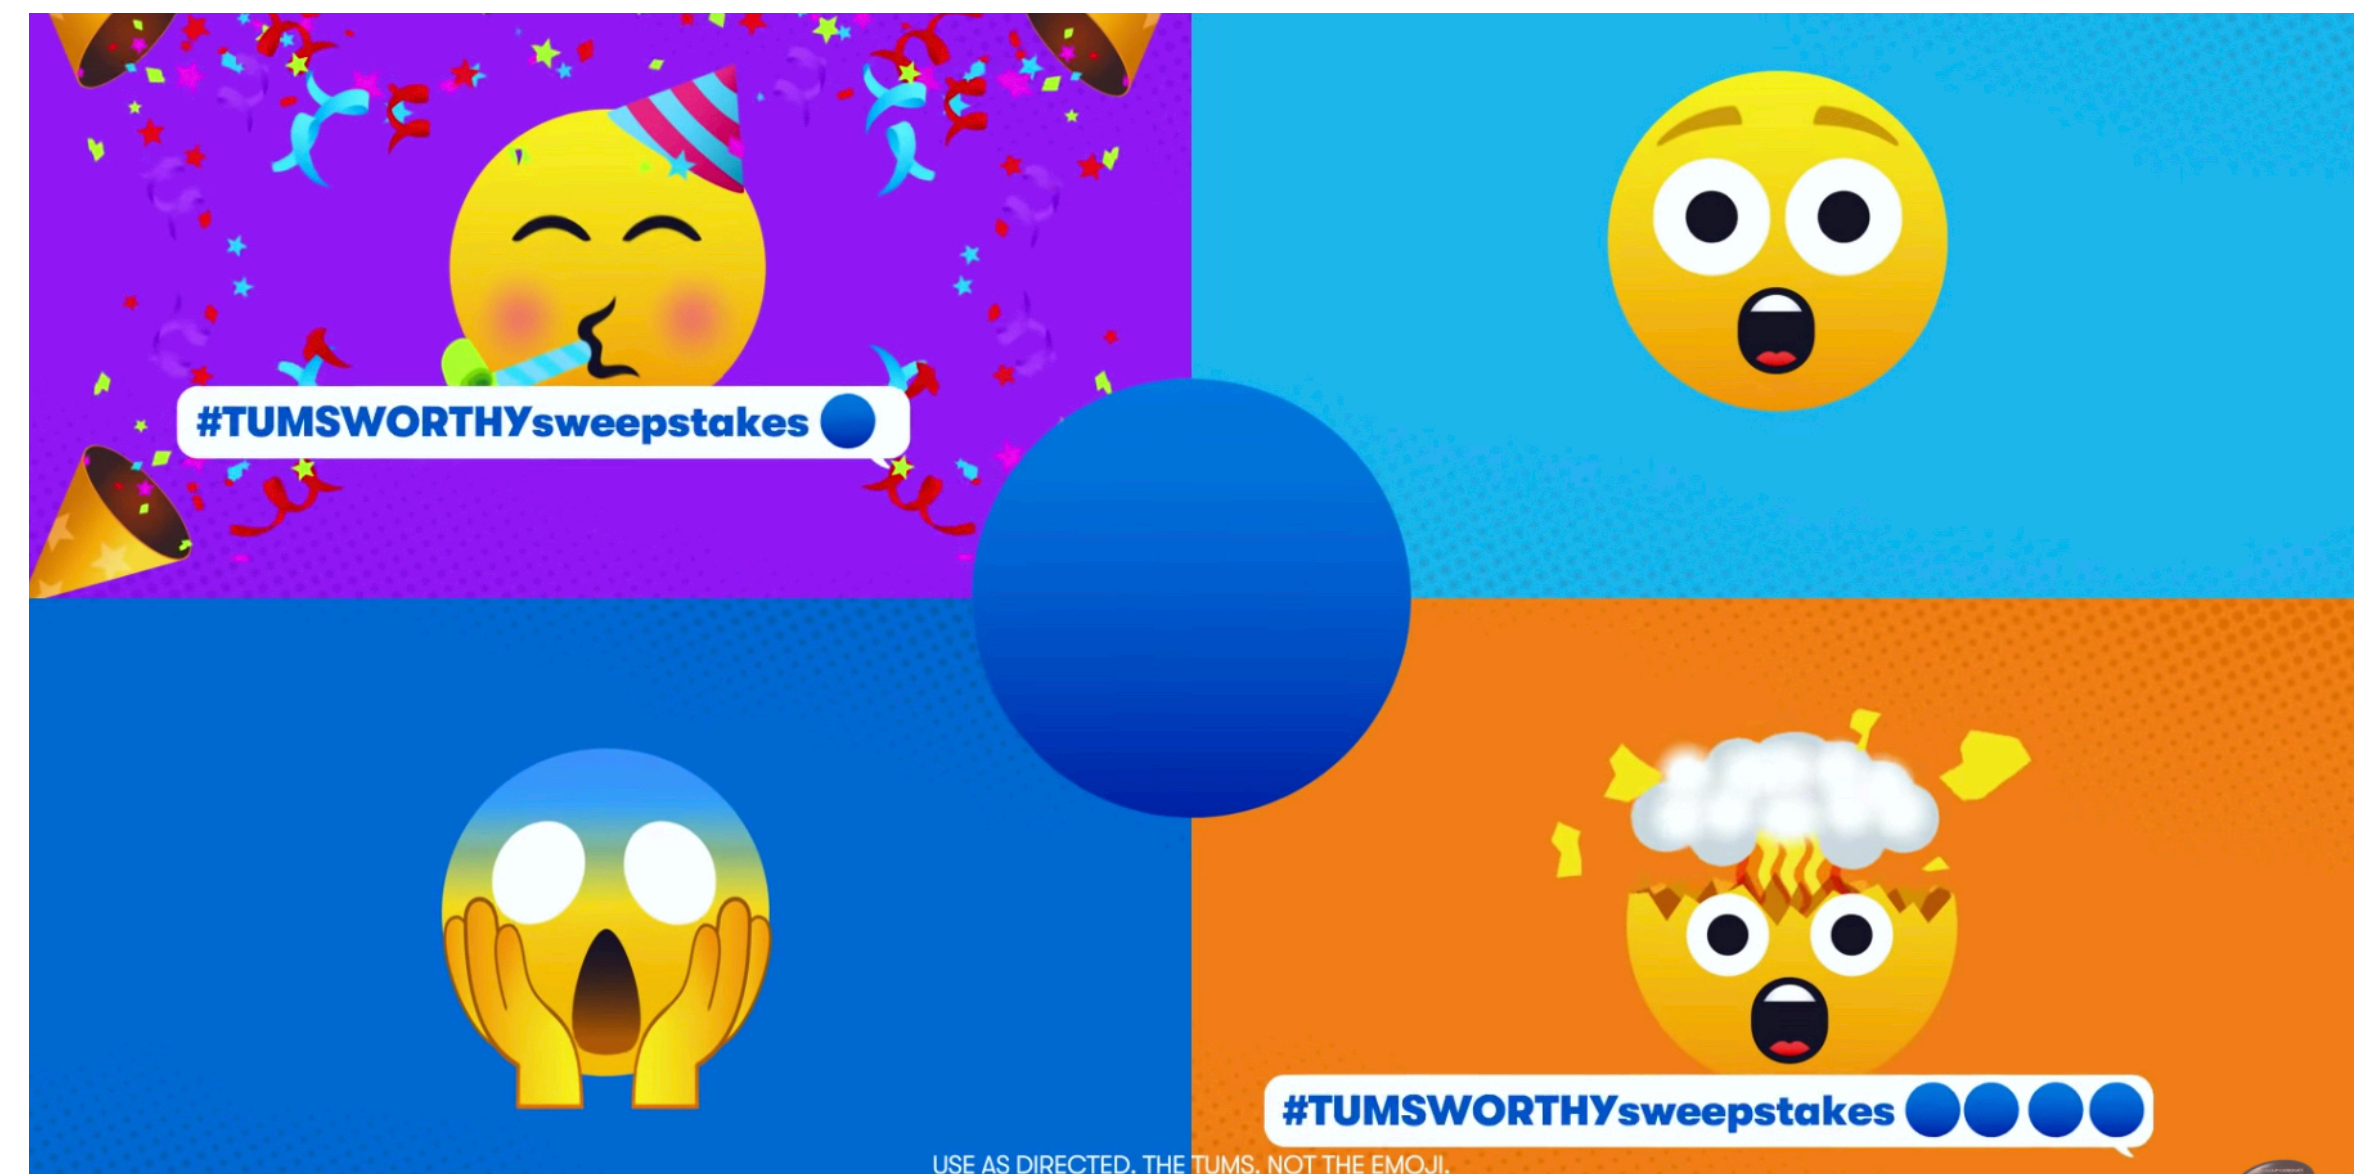

JoyPixels emoji featured in advertising campaigns.

Case Study:

Tums

Tums is a well known over the counter medicine, sold worldwide. They optioned for both JoyPixels 6.0 icons and Animations 3.0 to be featured in a wide array of ads, including broadcast.

The campaign takes good advantage of our vast icons. Notice how they're using the blue dot emoji to represent their brand.

RETAIL

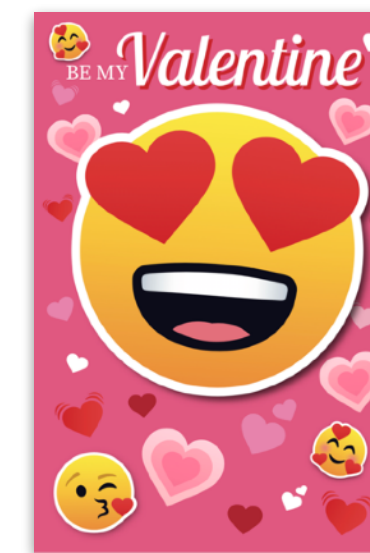

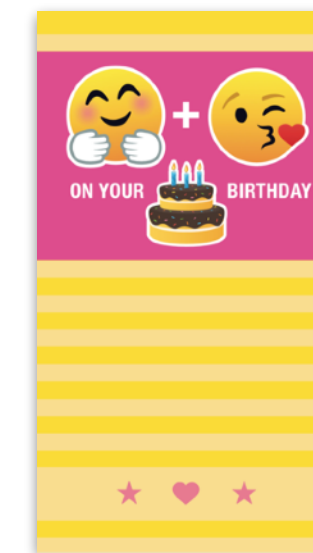

JoyPixels emoji featured in consumer products.

Case Study:

Danilo

Danilo is Europe's leading publisher of licensed Calendars, Greetings Cards, Gift Wrap, Gift Bags and Diaries.

Danilo selected JoyPixels as a license partner to bring emoji-packed greetings cards and other gift packaging to retail. With 1000's of icons, the options are endless. Nothing speaks to a younger audience like emoji.
